

**RIGID ARTICLE INSIDE A FLEXIBLE  
MAIL PIECE  
IS IT A PARCEL?**

\* When determining whether the mail piece can be cased, some re-positioning of the rigid item(s) inside the mail piece may occur during the normal casing process. Management may not require the carrier to make extraordinary efforts to rearrange /relocate the rigid item(s) within the mail piece in an attempt to case a mail piece that could not otherwise be cased.

I Does the flexible mail piece that contains the rigid item fit into The [or flat] separation with other mail

without damage To the mail piece?

Is the flexible mail piece that contains the rigid object greater than 6 in width? (Address orientation)

*Yes | NO IT'S A PARCEL 1 | IT'S A FLAT V*

the mail piece may occur during the normal casing process. Management may not require the carrier to make extraordinary efforts to rearrange or include the rigid item(s) within the mail piece: in an attempt to use a mail piece that would not otherwise be used.

" When determining whether the mail piece can be used, some re-positioning of the rigid item(s) inside the mail piece may occur during the normal casing process. Management may not require the carrier to make extraordinary efforts to rearrange or include the rigid item(s) within the mail piece: in an attempt to
