

IMPORTANT!

NOTICE TO ALL RURAL CARRIERS

Rural Route Evaluated Compensation System (RRECS) SCANS

**Failure to complete RRECS scans will
negatively impact your paycheck!**

Every rural carrier should have received training on the new RRECS MDD scans from their supervisor or manager. Every rural carrier needs to be using these new entries daily.

These entries are crucial to the success of the Rural Route Evaluated Compensation System and will affect your route evaluation under the new system.

If you have not received training or feel you have not received adequate training on the proper use of these MDD entries, you should immediately request training on the scans from your manager. If you do not receive the proper training, contact your NRLCA District Representative immediately!
